

SUSTAINABLE DEVELOPMENT GOALS

12.4.1 Publication of a sustainability report Year

Yes , Annually

UBT is a proud signatory of the Principles for Responsible Management Education (PRME) initiative, which underscores our commitment to advancing sustainability in education

and operations. As part of this commitment, UBT is required to submit annual reports to PRME. These reports highlight the university's alignment with the principles of responsible management education and document its ongoing efforts and achievements in sustainability.

Building on this foundation, UBT has recently launched a sustainability mega project, aimed at embedding sustainability across all facets of the university's operations and activities. To ensure the effective implementation of this initiative, a dedicated Sustainability Committee has been established. This committee is tasked with overseeing the project, ensuring alignment with UBT's strategic goals, and driving measurable outcomes.

The Sustainability Committee will take the lead in preparing and submitting detailed reports that document the execution of sustainability practices. These reports will serve not only to confirm the implementation of sustainable initiatives but also to provide transparency, track progress, and identify areas for continuous improvement.

By combining the PRME reporting requirements with the Sustainability Committee's oversight, UBT ensures a robust framework for monitoring and reporting its commitment to sustainability and responsible management education.
